

## WHAT WE ARE

A SaaS non-profit agency that focuses on behavioral health to improve student, school, and societal outcomes.

## OUR MISSION

Is to help underserved youth develop the Social Emotional qualities that are needed for success.

## #1 PROBLEM WE SOLVE

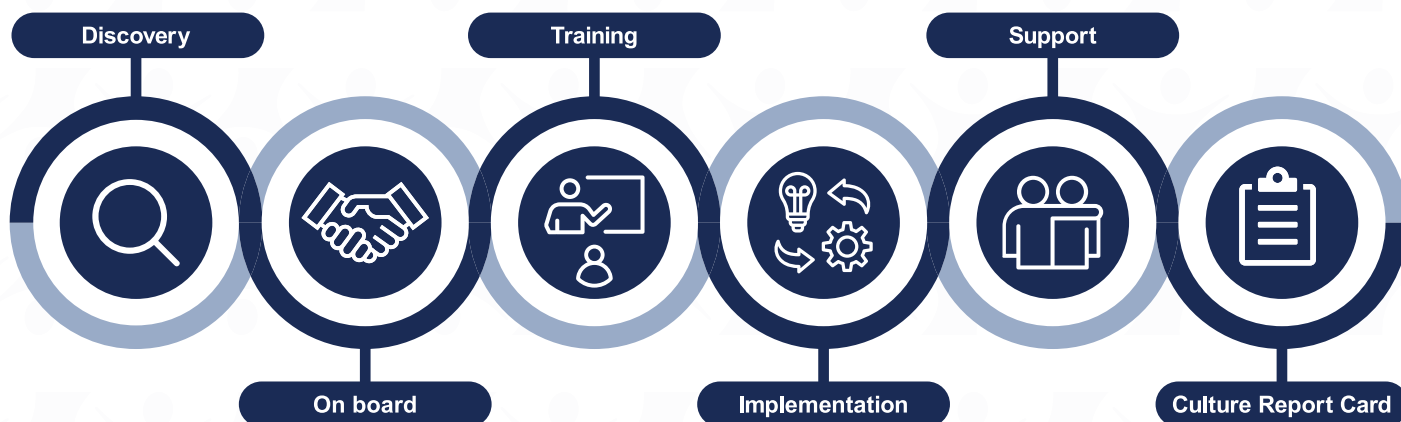

The #1 problem many schools face is behavioral issues that disrupt the learning environment and create a poor classroom culture.

## WE SOLVE THAT!

We created a comprehensive **social and emotional learning (SEL)** program that equips administrators with the data they need to support their teachers and students, supports teachers with resources to improve classroom management and student behavior issues, and engages students with a fun, gamified program that rewards their responsible decision making and ultimately helps meet their needs.
